DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the abstract should be in the form of a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Haines. Haines, in the embodiment of figure 4 for example, teaches a vehicle in the form of a forklift (94) including a wire pull and return device (84) showing all aspects of the above claims.

Allowable Subject Matter

Claims 1-8 and 12-14 are allowed at least because none of the cited or applied prior art shows or fairly suggests a container including the instantly recited holding member and reception dish attached to the container in the manner instantly recited.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of Kodama et al, Mizuno et al'913, Mizuno et al'122 and Mizuno et al'720 are all also cited as further examples of prior art molten metal supply devices and containers.
